

Lo-Fire Glaze : Lead Free

CONTINENTAL CLAY™ RAKU GLAZE

Cone 09-05

Raku firing is a wonderful process of experiencing unexpected results. No two firings are alike. Dozens of unique shades and colors are achieved by using our series of 8 Raku colors while exploring the process. Our White Glaze(GC127) is an excellent base color. In reduction, Turquoise Flash will give gold, orange, pink and copper flashes, Wheat Flash will give gold, copper, yellow and green flashes. To show crackle pattern rub on staining mediums and wipe clean. **Raku glazes are not food safe.**
